Bi-Annual Review
January-June 2021
CHAT focuses their work at the nexus of where ecosystems are fragile and communities are the most underserved. Whilst using their innovative Population Health & Environment (PHE) approach, CHAT focuses on the following goals:

1. **Increase access** and use of family planning.
2. **Enable positive behavior change** for increased family planning uptake and environmental sustainability.
3. **Increase empowerment and resilience** of communities through self-sustaining governance structures.

CHAT focuses on getting as much contraception out to underserved communities as possible; while partnering and supporting **Community Own Resource Persons (CORPs)** to go door-to-door in their own and surrounding communities. These CORPs provide information and counseling on family planning, C-19 & TB prevention and identification, HIV/AIDs counseling and testing whilst using CHAT’s innovative PHE approach. Each CORP supports their community in a customized way to the needs and challenges of that region, working alongside their own communities.

**A PHE approach recognizes the complex interconnection between people, their health, and the natural resources on which they depend. It provides a framework for understanding and addressing these issues holistically, on the assumption that the outcomes for both human welfare and the environment will be greater than if these issues are addressed separately.**

The areas CHAT works in
Northern Rangelands Ecosystem

This ecosystem reaches into Samburu and Marsabit counties.

The environment is dry, shrubby and remote.

CHAT works and partners with 12 CORPs.

- The total population is 1,038,116
- The poverty rate is at 66.7%

Deliverables:

- Family Planning clients reached: 15,328
- Clients who received contraception methods of choice: 7,846 (4,707 chose 3 & 5 yrs. protection methods)
- Basic curatives: 314
- C19 prevention: 15,328
- HIV/AIDS counseling and testing: 412
Tana River Ecosystem

This ecosystem reaches into Northern Kitui & Tharaka counties

Environment with critical water basin

CHAT works and partners with 6 CORPs

- Population: 1,529,364
- Poverty rate: 49.7%

Deliverables:

- Family Planning clients reached: 5,432
- Clients who received contraception methods of choice 2,902
- Basic curatives: 398
- C19 prevention: 5,432
- HIV/AIDS Counseling and Testing: 233
Mid Great Rift Valley Ecosystem

This ecosystem reaches into Baringo county

The environment is mixed-green highlands with low dry lowlands

CHAT works and partners with 1 CORPs

- Population: **666,763**
- Poverty rate: **41.4%**

**Deliverables:**

- Family Planning clients reached: **1,532**
- Clients who received contraception methods of choice: **846**
- C19 prevention: **1,532**
- HIV/AIDS counseling and testing: **159**
Lake Victoria Basin Ecosystem

This ecosystem reaches into Kisii and Homabay Counties

Environment with intense small scale farming and fishing

CHAT works and partners with 2 CORPs

- Population: 2,398,810
- Poverty rate: 57.15

Deliverables:

- Family Planning clients reached: 2,111
- Clients who received contraception methods of choice: 872
- C19 prevention: 2,111
- HIV/AIDS CT: 98
Ewaso Nyiro Ecosystem

This ecosystem reaches into Isiolo and Laikipia counties

Environment is dry, shrubby and remote

CHAT works and partners with 16 CORPs

- Population: 786,562
- Poverty rate: 45.6%

**Deliverables:**

- Family Planning clients reached: 17,927
- Clients who received contraception methods of choice: 12,028 (8,321 Long-term contraception methods of choice)
- Basic Curatives 2138
- Households with TB patients reached with health education on nutrition/infection control: 359
- C19 prevention: 17,927 with 1 positive case
- HIV/AIDS CT: 572
Mt. Kenya Ecosystem

This ecosystem reaches into Meru, Nyeri and Nanyuki

Environment of rivers, mountain and dry low land

CHAT works and partners with 3 CORPs

- Population: 2,304,878
- Poverty rate: 29.95

Deliverables:

- Family Planning clients reached: 3,286
- Clients who received contraception methods of choice: 2,036 (1,105 Long-term contraception methods of choice)
- C19 prevention: 3,286
- HIV/AIDS counseling and testing: 329
The Mara Ecosystem

This ecosystem reaches into Narok County

Environment are plains of wheat farming and wildlife

CHAT works and partners with 2 CORPs

- Population: 1,157,873
- Poverty rate: 33.7%

Deliverables:

- Family Planning clients reached: 3,561
- Clients who received contraception methods of choice 1,536 (989 Long-term contraception methods of choice)
- C19 prevention: 3,561
- HIV/AIDS counseling and testing: 199
Dagoreti Slum Ecosystem

This ecosystem is in Nairobi County

Environment is urban, polluted and over crowded

CHAT works and partners with 1 CORPs

- Population: 4,397,073
- Poverty rate: 21.80%

Deliverables:

- Family Planning clients reached: 1,981
- Clients who received contraception methods of choice: 942 (601 Long-term contraception methods of choice)
- C19 prevention: 1,981 with 4 positive cases and 1 fatality
- HIV/AIDS counseling and testing: 511
Mt. Kilimanjaro (Amboseli) Ecosystem

This ecosystem reaches into Kajiado County

Environment of lowland pastoralism and subsistent farming

CHAT works and partners with 2 CORPs

- Population: 1,117,840
- Poverty rate: 63.1%

Deliverables:

- Family Planning clients reached: 3,985
- Contraception methods of choice: 1,506 (908 Long-term contraception methods of choice)
- C19 prevention: 3,985
- HIV/AIDS counseling and testing: 55
Lake Turkana Ecosystem (Suguta Valley)

This ecosystem reaches into Turkana and Samburu county

Environment: One of the hottest places on earth

CHAT works and partners with 1 CORPs

- Population: 926,976
- Poverty rate: 87.5%

Deliverables:

- No data was reported in the ecosystem for the first half of the year.
Mau Forest Ecosystem

This ecosystem reaches into Nakuru county

Environment is deforested and overcrowded

CHAT works and partners with 2 CORPs

- Population: 2,162,202
- Poverty rate: 41.8%

Deliverables:

- Family Planning clients reached: 5,304
- Clients who received contraception methods of choice: 3,699 (2,468 Long-term contraception methods of choice)
- C19 prevention: 5,304 with 2 positive cases
- HIV/AIDS counseling and testing: 128
Aberdares Range Ecosystem

This ecosystem reaches into Nyandarua county

Environment of mountains, forestry, rivers and small scale farming

CHAT works and partners with 1 CORPs

- Population: 638,289
- Poverty rate: 49.8%

Deliverables:

- Family Planning clients reached: 1,922
- Clients who received contraception methods of choice: 934 (503 Long-term contraception methods of choice)
- C19 prevention: 1,922
- HIV/AIDS counseling and testing: 382
